Best skinny jeans men reddit

I know APC, Naked & Famous, and Nudie are popular brands on here, but I'm on a very tight budget and can't afford to spend more than \$100, maybe \$120 on jeans. My last couple was Levis, and when they ripped I was going to rearrange them, but heard that the company really has gone downhill over the last few years in terms of quality. Is there anywhere I can get one, maybe two decent pairs of jeans in this price range? Any help is greatly appreciated. Update: Wow, I didn't expect this thread to blow up so quickly! Thanks to everyone for the wonderful suggestion, I'm going to check some retailers and see if I can find any of these brandsPages 2 402 comments All products are independently selected by our editors. If you buy something, we can earn an affiliate commission. These dark indigo self-deedge jeans hanging in your wardrobe are excellent, but there's a whole new wave of denim out there. Here's our pick of the best jeans for men for your 2020 everyday lookJeans is probably one of the most important investments you'll make in your signature style. You might have a job that you wear them every single day, or you might have to slip them on once you've slipped out of your nine-to-five suit. Either way, they are an item you will wear more than any other you own. But over the past decade something funny has happened with jeans. When their status as a workhorse of a man's arsenal was cemented, they also became something of a starting point for an outfit, as opposed to the stars. The beauty of jeans is that they are a great canvas to build the rest of your get-up. Now brands are bringing jeans back to their rightful place front and center, where designers become more creative about cuts, colors and sinks. This is not only good news for men who're looking for a fit that slips on a little easier. So what are your options? On the most portable end of the spectrum, jeans fall into one of the following categories: straight legs, thin, boot-cut or tapered. What's the difference? Well, we're here to tell you, and if you're feeling inspired, be sure to collect some shopping inspiration from our best jeans picks below. Straight-play jeansThis style jean is for the guy who likes a more classic silhouette. Straight-leg jeans are typically casual, with space in the seat and thigh, perfect for everyday use. Skinny-fit jeansIf you're after a tight-fitting jean that shows off the very shape of your thighs and calves, then a thin-fit jean is what you'll be looking for. Tapered jeansPerfect for a muscular guy with chunkier thighs, tapered jeans are wider at the top and more pulled into the bottom. They are a great middle ground between slim and thin fit. Boot-cut jeansSure, you've probably been told to shy away from boot-cut jeans, but if you're after a 1970s-style fit à la Brad Pitt and Leonardo DiCaprio in Once Upon A Time In... Hollywood Reconsider. With a slimmer thigh and a sharp outward cone cone Bottom, pair with a Western style boot for a real menswear moment. Now, check out GQ's pick of the best jeans for men this season... FashionJeansDenimShoppingStyle Buyers Guide 31 commentsPage 2 31 comments Most people will agree that the winter fashion uniform is a turtleneck tucked into a pair of casual jeans, styled with sleek ankle boots. As soon as we get home, however, we remove our rigid jeans for something more comfortable like sweatpants. It's inevitable: Lounging on the couch watching Netflix is simply less comfortable when wearing stiff denim. In fact, however, you really can get the best of both worlds-non-rigid jeans with enough stretch in them is the ideal combination of stylish and comfortable. But finding the perfect stretch jeans? Not always the easiest. You see, some jeans are too elastic and look more like leggings than they do actual denim, while on the other hand, some jeans barely give to be considered legitimately comfy. That's a fine line. So as we get to the heart of winter and fashion-girl uniform stretch jeans and a turtleneck are growing ubiquitous, we've done you the favor of rounding out the seven best stretch jean brands so you know exactly where to turn to your next denim purchase. All you need now is a turtleneck. If you are a short, slim man, it is very difficult to find a pair of jeans that fit well and flatter your body type. Being short makes it hard to find jeans because almost all jeans will be too long. Very few manufacturers make jeans with inseams shorter than 30 inches. SEE ALSO: The clothing industry hates short men But since it's relatively easy to get pants hemmed, it's actually more important to find a pair of jeans that fit well everywhere else – especially around the hips and through your legs. If you're a skinny guy, this isn't an easy task, especially if you don't want to wear ultra low-rise jeans (which aren't usually the most flattering choice for shorter men). At just over 5'5 and 125lb soaking wet, I'm a little guy. Some might call me petite, but I prefer modest stature. It's always been hard for me to find jeans that fit well, and I usually end up compromising on something like the rise, leg opening or quality. That's why I decided to go in search of a big pair of jeans. There are a few brands I've always wanted to try (like A.P.C.), as well as some brands I haven't tried in a long time (like Gap). So I ordered 12 pairs of jeans from 10 different brands, tried them all on and documented the whole experience to help you figure out which brand will work best for your needs. Shop Post Now that it's out of the way, let's get on with the show. First, the highlights: My 3 Favorites #1: Gap Stretch Skinny - Surprisingly Awesome (see below). #2: Levi's 510 Skinny - Perfect middle ground between slim and thin. #3: Nudie Pipe Led - Pricey, slim, flattering and comfy. The Underdog Gap Stretch Skinny - Honestly, I l was better end The Gap, which is I hadn't tried on a pair of Gap jeans in a very long time. But out of all 12 couples, these were my favorite. Plus, they happen to be among the most affordable jeans out there. They are slim but not restrictive, and the light wash is actually perfect for casual outfits. What a pleasant surprise! Well played, Gap. Well played. Biggest disappointment A.P.C. Petit New Standard – I'd heard amazing things about these jeans, and they look so good on models, so I had high expectations. Unfortunately the ones I bought were way too big, which is ridiculous when I bought my actual size. I would have to size down to a 27 for them to fit properly (vanity sizing has gotten out of control). But the details (like the size and location of the pockets) would still be way too big for a smaller man. Not to mention, these were some of the most expensive jeans on the list! Just going to show, it's not just about the price or the label. 12 Pairs of Slim Fit Jeans See Me Try All 12 Pairs in Under 7 Minutes: And here's the full list, including: Fit photos Brand/style Size Also each pair is attached to one or more places you can buy them online, just in case you see something you like. #1: Gap Stretch Skinny My thoughts: These jeans fit well and look great. They probably won't age as well as higher quality denim, but still, I'm very happy with this purchase. #2: Uniqlo Slim Fit My thoughts: Uniqlo's slim fit isn't quite slim enough for my chicken thighs. Guess I should stop skipping leg day... #3: Uniqlo Skinny Tapered My thoughts: These must be hemmed (they only had 34 inseams in stock), but other than that they fit really well and they are very comfortable. These jeans almost made my top three. #4: Levi's 510 Skinny (eBay/Amazon) My thoughts: They fit well, they're affordable, and they're almost always available in a bunch of different sizes and colors. What's not to love? #5: Nudie Pipe Led my thoughts: These jeans are worth the price tag. They somehow manage to be super slim but comfortable at the same time. Believe me, I did a few lunges while wearing them just to make sure. #6: A.P.C. Petit New Standard My Thoughts: These run way large, so you need to size down at least two sizes to get a pair that fits. Denim and craftsmanship and clearly top notch. Too bad they're not made with the lesser man in mind. #7: Rag & Bone Fit 1 (Skinny Leg) My thoughts: I don't say it often, but these are a little too slim, especially in, ahem, seat. I actually tried a size 29 too, but it was too loose around the waist. That's why it's important to try on lots of different brands. Many are just not made for your build. #8: Mott & Bow Skinny My Thoughts: Certainly not thin, but very comfortable. It was way too long out of the box, so I got them hemmed to a more appropriate length. I think Mott & Bow offers high quality jeans at a competitive price, but I prefer a slimmer cut. can see more pictures of me wearing these jeans here and here. #9: Peter Manning NYC My Min What sets PMNYC jeans apart is that they are made specifically for short men. This means that every little detail – from the size of the pockets to the shorter increase – flatters the 'not so tall' body type. Just look at these back pockets compared to those on A.P.C. jeans! Peter Manning jeans are cut slim-straight, which will look good on most men, but I prefer a bit more conical through leg. Also keep in mind that the overall style of these jeans is rather classic (i.e. better suited for older gentlemen). You can see more pictures of me wearing these jeans in my Peter Manning review. #10: DSTLD Cigarette Raw My Thoughts: For raw denim, these are very affordable. They are also very rigid right out of the box, but I'm sure they will break in nicely. I just wish they had a slightly longer rise so I could wear them a little higher up on my waist. If you're looking for some entry level raw denim that you can break into and create some sick fades, bruh, these are a good choice. You can see more pictures of me wearing these jeans right here. #11: Lucky Brand Dean My Thoughts: At one point these were the slimmest jeans Lucky Brand had to offer. They have since been discontinued, but you can still find them on eBay. They are made of soft, washed denim that does not require any break-in, and they fit comfortably through hips and legs. These may be the most comfortable jeans I own, but they are not the most stylish. You can see another picture of me wearing these jeans on the Start Here page. #12: Levi's 522 Slim Taper (eBay/Levi's) My thoughts: The 522 is Levi's attempt at slim fit jeans for guys with big hips, butts and/or thighs, and they work perfectly for this body type. On me, they're a little baggy. But if you spend plenty of time under the squat rack or have a little extra junk in the trunk, 522 can be your new best friend. Unlike other jeans that will accommodate large thighs, these are actually conical gently for a sleek, flattering leg opening, which is perfect for short men. Experience Trying on all these different jeans was an extremely useful exercise. I tried a few brands that were new to me and some that I just hadn't tried in a few years. I learned so much about the different brands and styles. Although this was a lot of work, I recommend it to anyone who hasn't yet found the perfect pair of jeans or a go to the brand. If you go through this exercise yourself, it's very likely that you'll find your new favourite pair of jeans, and we both know how big the perfect pair of jeans makes you feel. What are your favorite jeans? Leave a comment below! Below!
